EXPERIENCE

Evolution IT, São Paulo, SP — *Software Developer*

08.2015 - 04.2016

Developed mobile applications for a range of customers and platforms, including native iOS (Objective-C) and hybrid apps (Phonegap).

The University of Sydney, Sydney, NSW — *Research Intern*

12.2014 - 02.2015

Responsible for developing the Android Mobile Application in a Research Project where we would track objects in a video from a server, and notify the smartphone users when it moved.

EDUCATION

Mackenzie Presbyterian University, São Paulo, SP — *B. Sc. in Computer Science*

07.2013 - 07.2018

The University of Sydney, Sydney, NSW — *Science Without Borders Program*

07.2014 - 07.2015

PROJECTS

NFC Activity Monitor

An android module using the Xposed Framework that logs all the information applications send using your NFC.

Dictionary for Android

App who works in background and detects words copied by the user to send a notification with its definition.

UOL Jogos Mobile

Mobile version of Brazil's largest forum, made using a web scraper, since it doesn't have an API.

SKILLS

Proficient in **Java**, **Javascript** and **Objective-C**.

Familiar with **C#**, **SQL**, **PL/SQL**, **HTML** and **CSS**.

I've also worked with **GIT** and **SVN**.

I'm comfortable with **Android Studio**, **Xcode**, **Eclipse** and **Netbeans**.

AWARDS

Science Without Borders was a nationwide program who selected the best students in the country and gave a full scholarship to study abroad and do research work on the best universities across the globe.

VOLUNTEERING

During my summer in Australia, I volunteered to help out international students in different events at the university.

LANGUAGES

Full working proficiency in both **English** and **Portuguese**.

I also have an intermediate understanding of **French**, and basic **Spanish**.
